

**SAVE THE DATES!
APRIL 26-27, 2010, OTTAWA, CANADA**

Back by popular demand, the Canadian & East Coast Chapters of the SAFE Association are pleased to announce our Joint Chapters Spring 2010 Symposium in beautiful Ottawa, Ontario, Canada, with the theme, “Transforming for Tomorrow’s Warfighter Protection Needs...TODAY!”

The inaugural Joint Symposium of the Canadian & East Coast Chapters was held in Ottawa in August 2006, and was attended by many key members including NAVAIR PMA202 Program Managers & Engineers, Canadian Air Force ALSE Life Cycle Material Managers, Industry members from both sides of the border, and of course several members of the SAFE National Board of Directors.

The 2010 Joint Chapter Symposium will be held at the National Defence Headquarters Warrant Officer’s & Sergeant’s Mess, 4 Queen Elizabeth Drive, Ottawa. Once again, the event promises to provide an excellent forum for information between Canadian & US Government and Industry counterparts. A few examples of briefings on the program so far include: “DND ALSE – A New Strategic Roadmap for Acquisitions”, and “Lessons Learned – Canadian Air Force Helo Aircrew Deployed to Afghanistan”.

Stay tuned for additional details. A complete Symposium information package is in development and will include registration and logistics (lodging and travel) details, as well as a detailed technical program that you won’t want to miss. We look forward to seeing you all there!

For more information please contact Symposium co-chairs:

Jason Leggatt, Canada Chapter President
